Web Application

- o HTTPS security
- o Uses random port #

Example: <https://192.168.1.23:19478>

- o Passcode entry required
- o No data is saved on client

We want the benefits of the cloud but not the security shortfalls.
We want secure access to our data in our pocket and on any screen in front of us.
We never want our data to hit the Internet.
